NEW GATE OPERATION GUIDE

We have received many questions about our new gates and now that all three have been installed I thought it would be beneficial to include the Operational Guide sent to us by the contractor. Of course, anyone with questions is still encouraged to give us a call at (818) 896-5271 or to stop by the office and see us in person.

There are two configurations to our new gates. In one instance the barrier arm is installed before the iron gate and in the other instance the barrier arm comes after the gate. (see diagram on the back)

When the Barrier Arm Precedes the Gate:

Vehicles must stop over the detector loop at the card detector.

Then swipe your card between 4 and 22 inches from the detector. (There is a 30 second delay in the system after someone swipes a card so please wait until the vehicle in front of you has completed going through the gate before swiping your card).

Proceed through the barrier arm once it is in a full open position. A photo eye mounted on the barrier arm detects the vehicle has cleared and triggers the arm to lower. Make sure you are clear from the arm if you have a high vehicle. The lowered barrier arm triggers the gate to open.

*Drive through the gate once it has completed opening. **These gates sound an alarm when the gate opens and closes. Be sure to drive straight through the gate when they open as they have a closing timer and will strand a vehicle inside the holding bay.***

When the Gate Precedes the Barrier Arm:

Vehicles must stop over the detector loop.

Then swipe your card between 4 and 22 inches from the detector. (There is a 30 second delay in the system after someone swipes a card so please wait until the vehicle in front of you has completed driving past the barrier arm and it has closed before swiping your card).

The gate receives a signal that the vehicle is over the detector loop triggering the gate to open. Do not proceed until the gate is in its full open position.

Move into position between the gate and the barrier arm. A photo eye mounted on the gate post detects the vehicle has cleared the gate triggering the gate to close. Make sure you are clear of the gate.

The gate closure triggers the barrier arm to open. Drive past the barrier arm once it is in its full open position.

No trucks, trailers or vehicles over 28 feet long may use the new access gates. Please notify Airport Admin/Ops at (818) 896-5271 or (818) 312-2911 if you need to enter or exit the airside. Entry and exit from the airside can only be accomplished at the main parking lot and with the assistance of airport staff.

Pedestrians are prohibited from entering or exiting through the vehicle gates. Pedestrian entrances and exits are located next to the Administration Office. The code to open these gates is the WHP ground frequency, 125. No code is needed to exit the airfield.

I thank you all for your assistance in helping to making this gate upgrade go smoothly. Anyone who has yet to replace their old gate card should do so as old cards no longer work at any of our gates. Please contact me at (818) 896-5271 with any questions.

Airport Display Days

KPOC

Every 3rd Sunday
10AM-2PM

KCPM

Every 1st
Saturday and Sunday
10AM-2PM

KEMT

Every 4th Sunday
9AM-1PM

KWJF

Every 2nd Saturday
All Day

KWHP

Every 2nd Sunday
10AM-2PM
